

FUTURE CLASSROOMS

Shaping

o u r f u t u r e

For phase three of a European Project 'Sharing our Past; Shaping our Future', pupils were asked to consider what a classroom of the future might look like.

Some pupils chose to reflect what they thought a classroom might be like, and others showed what they *wished* they would be like.

The pupils from schools in Croatia, England, Finland, the Netherlands, Poland, and Spain, all participated in a 'future classroom' design competition and were able to present their designs in a variety of media.

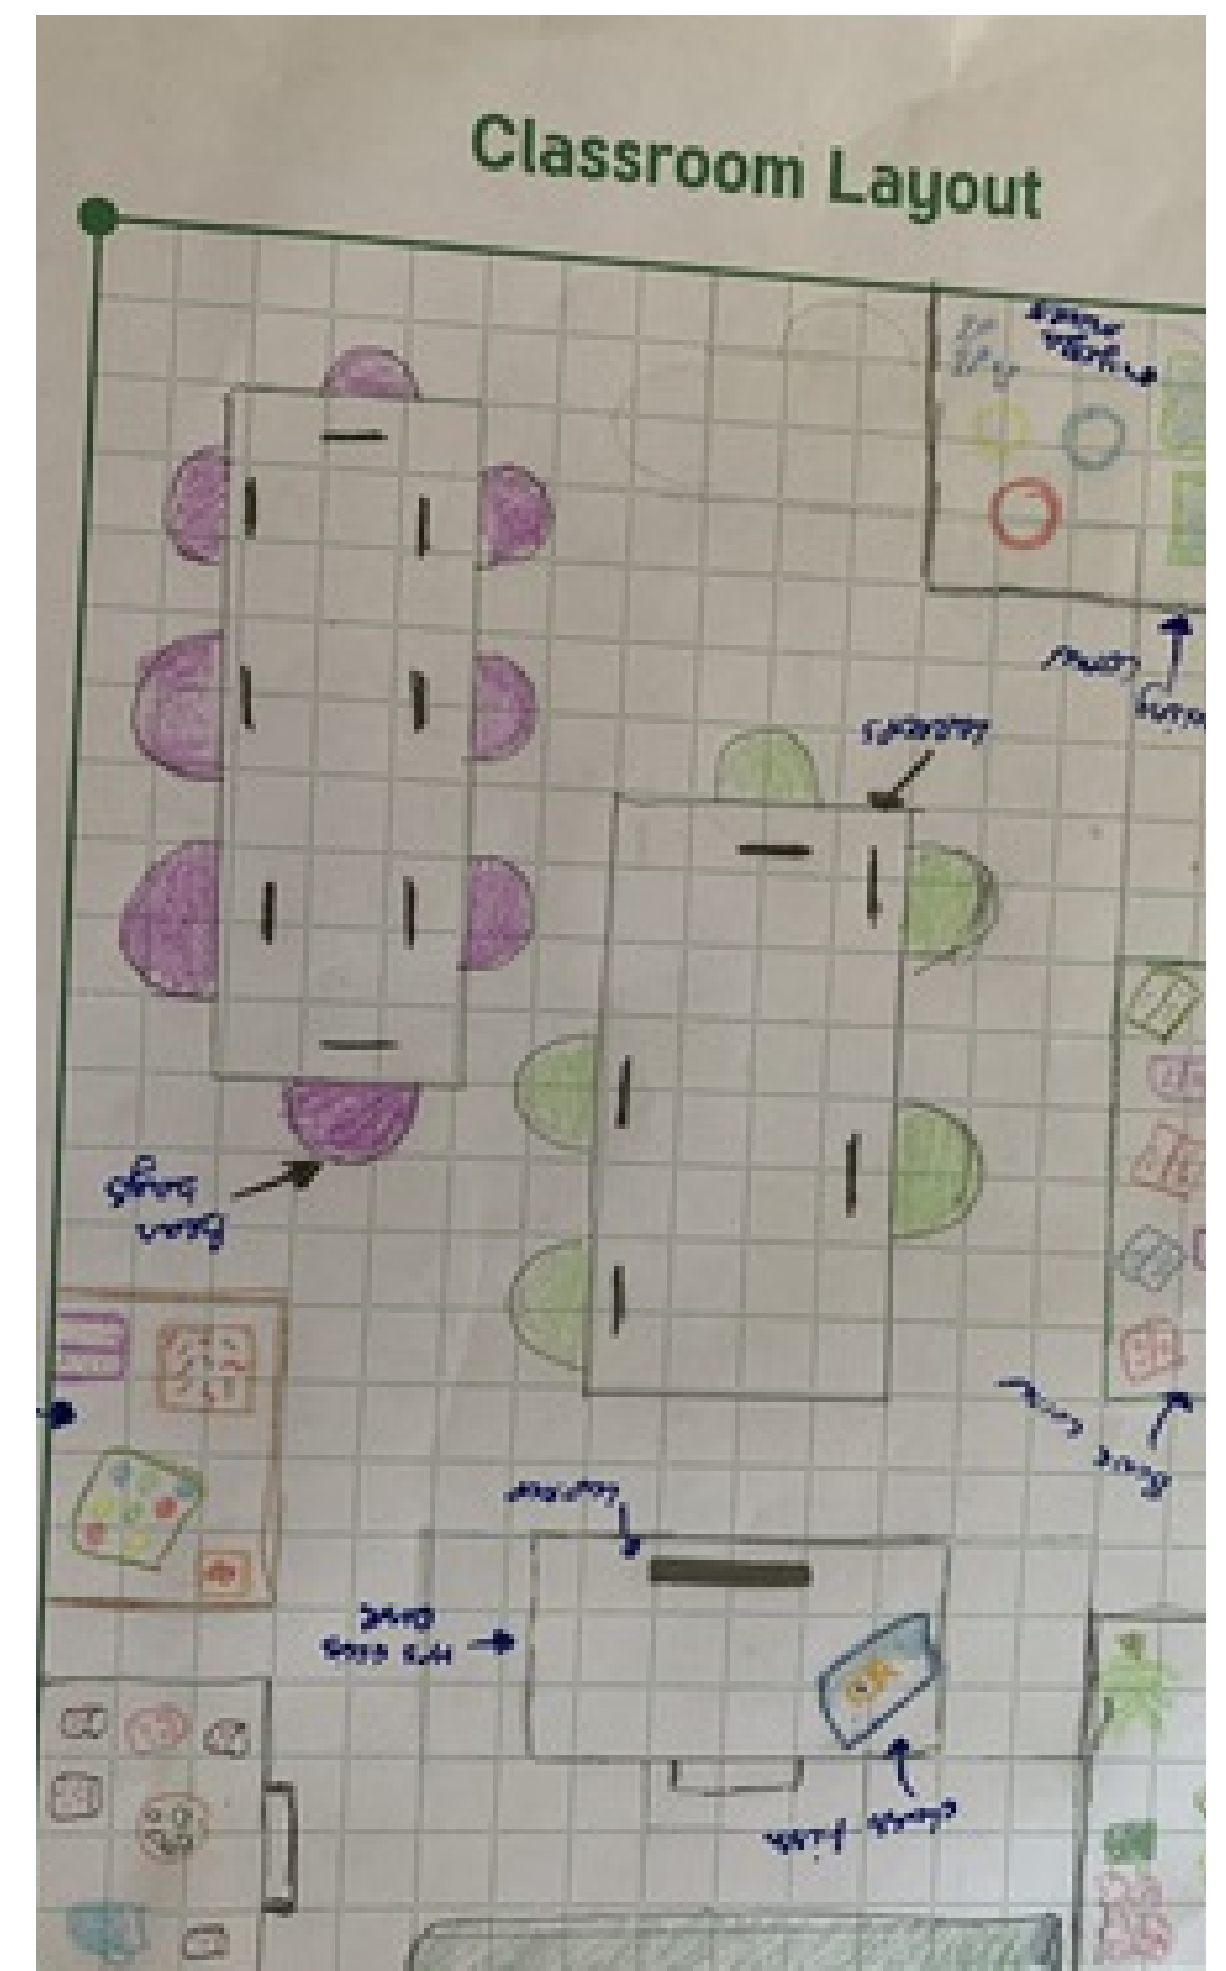

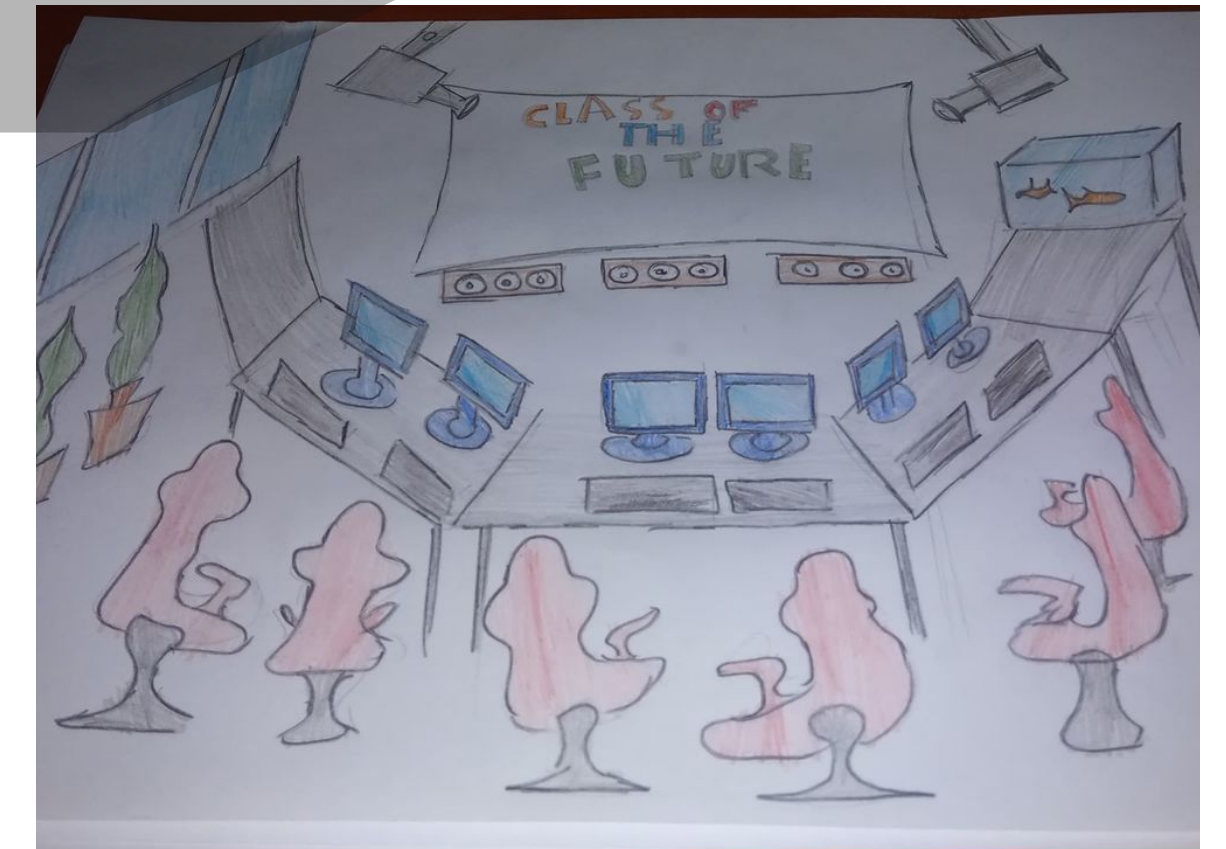

The following results are from ages 6-15.
